CYBERCRIME TRAINING COURSE 15th – 17th December 2010, **Milele Beach, Mombasa.**

The role and importance of *Information & Communications Technology* is ever increasing as more organizations leverage the benefits of computerization. The evolution of the mobile phone has led to an intensely networked global society.

While these developments have opened great opportunities for business efficiency, numerous doors of negative opportunity have opened, both localized and wide area engagements on which criminal activity is thriving. The effects are far-reaching with the potential for large losses on organizations.

This course is designed to enhance the Information Systems Security Management Environment in organizations by equipping staff at all levels with knowledge and skills that adequately address both theoretical and practical issues affecting Internet and Networking Security.

WHY LEARN CYBER CRIME

- a) Almost everybody is using computers, from white collar criminals to terrorists' organizations, from teenagers to adults.
- b) Conventional crimes like forgery, extortion, kidnapping etc. are being committed with the help of computers.
- c) The new generation is growing up with computers.
- d) MOST IMPORTANT- Monetary transactions are moving on to the INTERNET.
- e) All organizational confidential information is handled via computers.
- f) Litigation and mitigation are moving to digital state.
